

Adeen Shahzad

Islamabad, Pakistan | adeen.cys@gmail.com | github.com/anon-443 | linkedin.com/in/adeen-shahzad-anon-443.github.io/Portfolio

PROFESSIONAL SUMMARY

Cybersecurity undergraduate with two years of hands-on experience across offensive security, web application testing, VAPT, AI security automation, SOC operations, malware analysis, and digital forensics. Experienced in reconnaissance, vulnerability validation, controlled exploitation, threat detection, security reporting, and secure application development. Currently working in AI security engineering and SOC operations. Open to paid internships, junior security roles, and security engineering opportunities.

CORE COMPETENCIES

- Offensive Security and Red Team Operations
- Web Application VAPT and OWASP Top 10 Testing
- AI Security Automation and ML Based Threat Detection
- SOC Monitoring, Incident Triage, and Threat Intelligence
- Malware Analysis, DFIR, IOC Extraction, and MITRE ATT&CK Mapping
- OSINT, Digital Footprinting, Security Reporting, and CVSS Scoring

PROFESSIONAL EXPERIENCE

AI, Automation & Security Engineering Intern

Jul 2026 — Present

THE ARZENS

Remote

- Built Python and Ollama security pipelines for real time threat analysis, anomaly detection, and automated risk classification.
- Engineered intrusion detection models with Random Forest, XGBoost, and MLP using CICIDS2017 structured data.
- Applied NIST AI RMF practices through risk assessments, drift detection, and reproducible feature engineering workflows.

SOC Analyst Intern

Aug 2026 — Present

Tech Biz Security

Remote

- Monitored and correlated SIEM events, triaged incidents, and escalated findings through structured runbooks.
- Mapped attack patterns to MITRE ATT&CK and automated repetitive SOC tasks with Python.

Red Team Intern

Jun 2026 — Sep 2026

Cyberster

Remote

- Performed reconnaissance, vulnerability scanning, controlled exploitation, and adversary simulation in isolated lab environments.
- Documented attack paths and delivered remediation reports with secure configuration and least privilege guidance.

Ethical Hacking Intern

Jul 2026 — Aug 2026

Tech Biz Security

Remote

- Tested web applications for SQL injection, XSS, authentication bypass, and IDOR using Kali Linux and Burp Suite Professional.
- Prepared OWASP Top 10 aligned remediation documentation for session management, logging, and input validation issues.

DevOps & Web Development Intern

Aug 2026 — Sep 2026

TechSkillHub

Remote

- Deployed containerized applications with Docker and managed environment variables and secrets securely.
- Built React, FastAPI, and PostgreSQL features with JWT authentication and role based access control.

Web Development Intern

Aug 2026 — Sep 2026

Sqrock IT Solutions

Remote

- Developed responsive frontend components and REST API integrations with RBAC and OAuth flows.
- Applied OWASP aligned input handling practices across web application features.

SELECTED SECURITY PROJECTS

Security Architecture and Automation, ZTNA Self Healing Network Architecture github.com/anon-443/ZTNA-Self-Healing-Network-Architecture

- Designed a NIST SP 800-207 Zero Trust layer with per request trust scoring, AI threat analysis, and automated iptables enforcement.

Security Engineering, Secure Distributed File System with AI Monitoring github.com/anon-443/Secure-Distributed-File-System-with-AI-Monitoring-Agent

- Built encrypted multi node storage with AES-256-GCM, JWT Zero Trust authentication, service replication, and Ollama based threat analysis.

Malware Analysis and DFIR, VARE Static Malware Analysis Tool github.com/anon-443/YARA-Strings-Metadata-Static-Malware-Analyzer-Tool

- Built a Python GUI tool for PE metadata analysis, entropy scoring, Base64 extraction, YARA matching, weighted threat scoring, and PDF reporting.

DevSecOps Platform, SecurePipeline github.com/anon-443/SecurePipeline

- Developed an enterprise DevSecOps deployment platform that brings security checks, container delivery, configuration control, and audit practices into one workflow.

Security Assessment Platform, CyberShield SME github.com/anon-443/cybershield-sme

- Built a permission first posture assessment tool using passive HTTPS, DNS, and RDAP checks with evidence based scoring and remediation guidance.

TECHNICAL SKILLS

- **Offensive Security:** Burp Suite, Metasploit, Nmap, OWASP ZAP, SQLMap, Hydra, Hashcat, Gobuster, FFUF, Nikto, Shodan, theHarvester, Netcat
- **Defensive Security and DFIR:** Wireshark, Wazuh SIEM, Snort IDS, Nessus, YARA, VirusTotal API, Volatility, Autopsy, IOC analysis
- **AI and Security Automation:** Python automation, Ollama, Scikit-learn, XGBoost, TensorFlow, anomaly detection, local LLM integration, NIST AI RMF
- **Programming:** Python, Bash, JavaScript, SQL, C++, x86 Assembly, HTML, CSS
- **Frameworks:** OWASP Top 10, MITRE ATT&CK, NIST SP 800-207, ISO/IEC 27001, CVSS v3.1, Zero Trust, PTES
- **Platforms:** Kali Linux, Parrot OS, Ubuntu, Windows, Docker, Git, GitHub, VirtualBox

EDUCATION

Air University Islamabad, Pakistan
B.S. Cybersecurity 2024 — 2028

- Relevant coursework: Network Security, Cryptography, Ethical Hacking, Secure Software Development, Digital Forensics, Operating Systems.

HITEC School and College for Girls Pakistan
Intermediate in Computer Science 2022 — 2024

CERTIFICATIONS AND ACHIEVEMENTS

- ISO/IEC 27001:2022 Information Security Associate — SkillFront
- Cyber Threat Intelligence 101 — arcX
- Foundation Level Threat Intelligence Analyst — arcX
- SOC Foundations — Microsoft Forge
- Critical Infrastructure Protection — OPSWAT Forge
- SQL Injection Attacks — EC-Council
- Intro to Dark Web, Anonymity and Cryptocurrency — EC-Council
- TryHackMe Top 9% global ranking through hands on security labs
- Top 10 finalist at RDX CTF and AIRange CTF
- Top 50 finalist at NUST National Hackathon
