SKILLS

- Penetration Testing
- Network Security
- Malware Analysis
- SOC & CTI Analysis
- OSINT & Forensics
- Secure App Development
- CTF Competitions

TOOLS

- Kali Linux / Ubuntu / Parrot OS
- Wireshark / Ettercap
- Burp Suite / Nmap
- YARA / Metasploit
- Python / C++ / Bash
- Git/GitHub

FRAMEWORKS

- MITRE ATT&CK;
- OWASP Top 10
- NIST SP 800-207
- ISO/IEC 27001:2022
- Zero Trust (ZTNA)

ACHIEVEMENTS

- RDX CTF - Top 10
- AIRange CTF - Top 10
- NUST Hackathon - Top 50

PROFILE

Cybersecurity undergraduate with hands-on experience in penetration testing, malware analysis, and secure development. Top-10 finalist in two national CTF competitions. Applies MITRE ATT&CK, OWASP, NIST, and ISO/IEC 27001 frameworks in practical projects. Seeking an internship in offensive security, SOC, or application security.

EDUCATION

B.S. Cybersecurity - Air University	2024 – Present
Intermediate (CS) - HITEC Girls College	2022 – 2024

PROJECTS

VARE - Static Malware Analysis Tool

Python, YARA, MITRE ATT&CK, ReportLab

- Weighted threat scoring (0–100) with MITRE ATT&CK; mapping; YARA rules, Shannon entropy, Base64 decoding without execution.
- 5-tab GUI (CustomTkinter) + automated PDF analyst reports via ReportLab.

MediConnect - Secure Healthcare Web App

FastAPI, PostgreSQL, React, JWT, RBAC, OWASP

- JWT + RBAC secured APIs; OWASP Top 10 applied - bcrypt hashing, input validation, rate limiting.
- Haversine-based hospital finder; PostgreSQL DB (5 tables); team of 4 using Git.

SDFS - Zero Trust Distributed File System

Python, ZTNA, NIST SP 800-207, AI Agents

- Zero Trust Architecture with AI autonomous agents for anomaly detection and automated incident response.

Network Security Lab - DNS Spoofing & Monitoring

Kali Linux, Ettercap, Bettercap, Wireshark

- DNS spoofing + ARP poisoning in controlled lab; built network monitoring tool for live traffic capture and event correlation.

Remote Desktop Control & Administration Tool

Python, Socket Programming

- Remote desktop tool for cross-network command execution and session management using Python socket programming.

CTF Tournament Scheduler Tool

C++

- Built a scheduling and bracket management system for CTF tournament organization in C++.

Keyed Caesar Cipher - Encryption / Decryption

Assembly, Irvine32

- Implemented keyed Caesar cipher encryption and decryption algorithms in x86 Assembly using the Irvine32 library.

VGG-16 Image Classification

Python, TensorFlow, Deep Learning

- Built and trained a VGG-16 convolutional neural network using TensorFlow for multi-class image classification.

CERTIFICATIONS

- **ISO/IEC 27001:2022 Information Security Associate** - SkillFront (Apr 2026)
- **Cyber Threat Intelligence 101** - arcX (Aug 2025)
- **SOC Foundations** - Microsoft (Sep 2025)
- **Critical Infrastructure Protection** - OPSWAT (Sep 2025)
- **SQL Injection Attacks** - EC-Council (Jan 2025)
